

Special publication on European chemical distribution

22 June 2009

“FECC is pleased once more to have ICIS as the official publisher of a special supplement for its annual congress, being held this year in Helsinki, Finland”

**Hendrik Abma,
Director General of FECC**

ICIS will publish a special 28-page publication on chemical distribution in Europe on 22 June, to coincide with the FECC Annual Congress in Helsinki, Finland. The publication will be circulated to all European readers of ICIS Chemical Business and all delegates at the Congress, as the official publication for the event. This is your chance to promote your company brand and message to chemical producers, distributors and logistics operators across Europe.

For the first time in Europe, ICIS TV is offering companies the opportunity to reach delegates at the FECC congress through advertising in specially recorded news bulletins to be displayed around the congress venue and in delegates' hotel rooms. Advertising slots of varying length are on offer and ICIS can prepare these for you as part of the overall cost, as well as letting you have the advert for your own future use.

Advertising deadline: 29 May 2009

Please contact your sales representative for details of the many advertising opportunities available.
