

Free Anti-bot and Anti-DDoS Support for Travel Businesses from Variti

The travel organizations have come under heavy pressure as a global market rout intensifies amid deepening concerns over the coronavirus outbreak. The situation is having a significant effect on the travel industry with weaker domestic and international demand and travel blocking in many regions.

In this challenging environment, Variti would like to support all the online travel services to cope with the situation. Today, it's crucial for them to work with no lags, delays and downtimes because of bot attacks. Thus, Variti is now providing its bot mitigation, fraud detection and DDoS attack prevention services for all the travel online resources for free for 6 months.

Who is eligible

All the European online travel services including any websites of travel businesses, online booking systems, and even travel blogs.

Free service that Variti offers

Variti provides a comprehensive bot mitigation, fraud detection and DDoS attack prevention based on its proprietary Active Bot Protection technology, which combines real-time intelligence and deep analytics to progressively diminish attacks. It identifies potential bad actors, validating and blocking fraudulent or unwanted interactions while keeping legitimate traffic safe.

We help to detect and defeat even the most damaging of attacks, including credential stuffing, account takeover attacks, brute force attacks, unauthorized aggregation, scraping and ad fraud.

You can learn more about Variti's security audit and bot mitigation products at variti.com.
